Pallet Flow Pick Module Swing Gate

PATENT PENDING

The Pallet Flow Pick Module Swing Gate is designed for high bay rack picking bays integrated with flow rails. The gates open automatically when the pallet is pushed into position on the pallet flow rails. The gates close automatically when the pallet flows into the picking position of the system.

- Easy opening swing gate
- Positive self-closing gate
- Available in custom sizes
- Fits into all manufacturers' rack
- Rugged construction ensures low maintenance
- Designed for new construction projects
- Adaptable for existing systems

An **OPEN** and **SHUT** Case for Plant Mezzanine Safety
